

**We are**

**HAVATEC**

PROCESSING EQUIPMENT FOR HORTICULTURE

**We change the world of  
international horticultural  
companies.**

**We make their work processes  
more efficient, more productive,  
more labour-extensive and of  
better quality.**

**We achieve this with our turnkey  
installations and by using our  
head, heart and hands.**

**Head**

**We have the determination to keep asking questions, to keep learning from mistakes, to keep discovering new things and to keep simplifying.**

No customer request is too complicated and no idea too absurd. We bring the request behind the request into sharp focus and peel away the layers of challenges to reveal their essence. Together we work to determine the most suitable solutions.

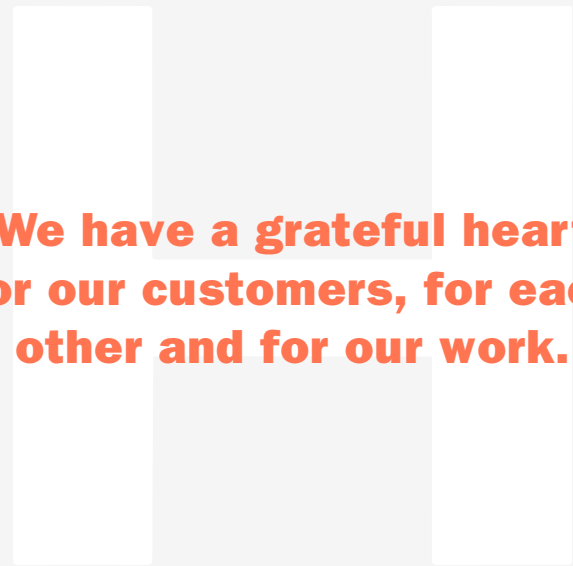

We have the determination to keep asking questions, to keep learning from mistakes, to keep discovering new things and to keep simplifying. We work and develop based on content and encourage each other to share ideas and stay inspired.

In doing so, we harness our brainpower, make the right connections and consider the right options, resulting in pioneering technical innovations that we apply to solutions that propel our customers around the world light years ahead.

**Heart**

**We have a grateful heart  
for our customers, for each  
other and for our work.**

We have a grateful heart for our customers, for each other and for our work. We gladly go the extra mile, never give up and anticipate what is to come. Our customers' interests are our interests and we are not successful until our customers are.

We are committed, genuinely interested and believe strongly in synergy: Can I help you? What do you think? How are things at home? That camaraderie has no limits and is open to honest feedback and everyone's opinion – even when we do not agree.

That sense of equality is what makes us Havatec.

**Hands**

**Everything that we do and create is reliable in every respect. And of a quality that is exceptional, safe, sustainable and 100% effective.**

Everything that we do and create is reliable in every respect. And of a quality that is exceptional, safe, sustainable and 100% effective. We make no concessions. We remain in control: proactive, enterprising and prepared. We keep each other informed, fulfil our agreements and do not accept any loose ends.

Internally, we combine our efforts, following the right direction and having each other's back. We do not get in each other's way, but offer a helping hand and give each other the extra nudge needed to get the best out of ourselves and to keep moving forward – with an open mind and progressing together.
